PVE launches new website and adds a "Dealers" page

PVE is pleased to share with you our new and improved website that was launched in December of 2010. The new site was designed to provide more detailed information and an updated look to the PVE product line for both end users as well as our network of PVE dealers. A password protected **Dealers** page has been added to the website to provide specific information ranging from User Manuals to DWG files to archived PVE newsletters. To request your password to access the dealer page on the website, please email Stefan Gruber at grubers@vacuumelevators.com or call in by phone. Also, if you have not done so already, please take the time to incorporate the PVE website as a link onto your website, informing potential customers that your company sells PVE products and is an authorized PVE dealer.

PVE Launches Air Driven Pool Lift at Pool, Spa, Patio Expo in Vegas

Pneumatic Vacuum Elevators has recently diversified our line of pneumatic elevators by introducing the AIR DRIVEN POOL LIFT. Through our years of experience with using air to create lift, PVE has recognized the need for a unique pool lift in the industry. The air driven pool lift, designed and manufactured by PVE, is powered by a 2HP air compressor and is a wheelchair accessible lift that can be installed in a full or empty pool with only four anchors. Some of the other notable features are the push button controls on the platform and on the deck, powering a 450lb. lift capacity, which far surpasses most other pool lifts on the market. If you are interested in additional information, please visit the website at www.vacuumelevators.com to obtain the Air Driven Pool Lift one pager, or call the office to speak with sales. Looking ahead, an interesting similarity and application for a platform lift has been realized. Do not be surprised if you hear about the PVE air driven platform lift in the future.

2011 Dealer Materials CD

In efforts of providing our dealers with as many resources as possible, a Dealer Materials CD was mailed out to all PVE dealers just before the holiday season. The Dealer Materials CD is intended to provide our dealers with the most recent and detailed information on all of our PVE models. The CD contains the following... all PVE models drawings and specs, a new gallery of installed PVE pictures, new marketing videos, PVE logos, and the installation video. If for whatever reason you did not receive a copy of the 2011 Dealer Materials CD, please email Stefan Gruber at grubers@vacuumelevators.com or call in by phone. We hope that providing the updated materials assists with your sales efforts in 2011.

Happy Holidays!

Dear PVE Dealer,

Please find the enclosed CD which contains updated PVE technical information and marketing materials. Nine years later and a full line of vacuum elevators, we want to ensure that our dealer network is properly equipped with the most up to date material to present to the market.

We would also like to take this opportunity to wish you and your staff a happy holiday season. We look forward to a prosperous 2011 and further developing our working relationship.

Sincerely,
PVE Management

RECENT AND UPCOMING TRADE SHOWS
